CONTENTS OF VOLUME 213

No. 1. *February* 1971

PAGE

Inward and delayed outward membrane currents in isolated neural somata under voltage clamp. By J. A. Connor and C. F. Stevens 1

Voltage clamp studies of a transient outward membrane current in gastropod neural somata. By J. A. Connor and C. F. Stevens 21

Prediction of repetitive firing behaviour from voltage clamp data on an isolated neurone soma. By J. A. Connor and C. F. Stevens 31

Passive vasodilatation of the hind limb after sympathetic preganglionic stimulation. By Franco Lioy and Canio Polosa. . 55

Vasoactive hormones in endotoxin shock: A comparative study in cats and dogs. By R. C. Hall and R. L. Hodge . . . 69

The frequency dependent character of the membrane capacity in cardiac Purkyně fibres. By E. Carmeliet and J. Willems . . 85

Electrical connexions between horizontal cells in the dogfish retina. By Akimichi Kaneko 95

Site of adrenaline blockade in the superior cervical ganglion of the rabbit. By D. D. Christ and S. Nishi 107

The effect of antidiuretic hormone on Na movement across frog skin. By M. Cereijido and Catalina A. Rotunno 119

Spontaneous activity of cerebellar Purkinje cells and their responses to impulses in climbing fibres. By Ann Latham and D. H. Paul 135

The orientation specificity of two visual after-effects. By Colin Blakemore and Jacob Nachmias 157

Brown adipose tissue metabolism *in vivo* and serum insulin concentrations in rabbits soon after birth. By M. J. Hardman, D. Hull and A. D. Milner. 175

Primary afferent depolarization and flexion reflexes produced by radiant heat stimulation of the skin. By R. E. Burke, P. Rudomin, L. Vyklický and F. E. Zajac III. 185

Stimulus–response relationships in first-order sensory fibres from cat vibrissae. By J. F. Hahn 215

PAGE

Control of water content of non-metabolizing kidney slices by sodium chloride and polyethylene glycol (Peg 6000). By J. R. Robinson 227

The binding of tetrodotoxin to nerve membranes. By R. D. Keynes, J. M. Ritchie and E. Rojas 235

No. 2. *March* 1971

The influence of wind resistance in running and walking and the mechanical efficiency of work against horizontal or vertical forces. By L. G. C. E. Pugh 255

Factors affecting the quantitative response of human eccrine sweat glands to intradermal injections of acetylcholine and methacholine. By K. G. Foster 277

Influence of lysine-vasopressin dosage on the time course of changes in renal tissue and urinary composition in the conscious rat. By J. C. Atherton, R. Green and S. Thomas 291

Influence of variations in hydration and in solute excretion on the effects of lysine-vasopressin infusion on urinary and renal tissue composition in the conscious rat. By J. C. Atherton, Jeanne A. Evans, R. Green and S. Thomas 311

Pulmonary stretch receptor activity in man: a comparison with dog and cat. By A. Guz and Diana W. Trenchard 329

The role of non-myelinated vagal afferent fibres from the lungs in the genesis of tachypnoea in the rabbit. By A. Guz and Diana W. Trenchard 345

Salt-gland secretion and blood flow in the goose. By Ann Hanwell, J. L. Linzell and M. Peaker 373

Cardiovascular responses to salt-loading in conscious domestic geese. By Ann Hanwell, J. L. Linzell and M. Peaker . . . 389

Intracellular concentrations of sodium, potassium and chloride in the salt-gland of the domestic goose and their relation to the secretory mechanism. By M. Peaker 399

Experiments on the liberation of phosphate from the muscles of the human forearm during vigorous exercise and on the action of sodium phosphate on forearm muscle blood vessels. By H. Barcroft, T. H. Foley and R. R. McSwiney 411

Cholinergic regulation of hepatic tyrosine transaminase activity. By Ira B. Black and Donald J. Reis. 421

PAGE

Effects of hexoses and anions on the erythritol permeability of human red cells. By JENS OTTO WIETH 435

The transformation of myosin in cross-innervated rat muscles. By M. BÁRÁNY and R. I. CLOSE 455

Chromatic sensitivity and spatial organization of cat visual cortical cells: cone-rod interaction. By P. HAMMOND 475

The distribution of cutaneous receptors in the rabbit's hind limb and differential electrical stimulation of their axons. By A. G. BROWN and R. E. HAYDEN 495

No. 3. *March* 1971

Pressure waves and gradients in the canine thoracic duct. By N. L. BROWSE, R. S. A. LORD and ALEXIS TAYLOR 507

Platelet aggregation and strenuous exercise. By L. POLLER, CELIA M. PRIEST and JEAN M. THOMSON. 525

Effect of prostigmine on the time course of the end-plate potential in the rat diaphragm. By K. KUBA and T. TOMITA 533

Correlation between nerve terminal size and transmitter release at the neuromuscular junction of the frog. By M. KUNO, S. A. TURKANIS and J. N. WEAKLY 545

Micropuncture studies of the electrochemical aspects of fluid and electrolyte transport in individual seminiferous tubules, the epididymis and the vas deferens in rats. By NORMAN LEVINE and DONALD J. MARSH. 557

The action of nerveside, a peptide extracted from brain, on myenteric ganglia in Auerbach's plexus. By N. M. SOH and C. C. TOH . 571

The effect of ACTH on calcium distribution in the perfused cat adrenal gland. By SIRET D. JAANUS and R. P. RUBIN 581

Geometrical illusions and the response of neurones in the cat's visual cortex to angle patterns. By B. DELISLE BURNS and ROY PRITCHARD 599

The mechanical and thermal properties of frog slow muscle fibres. By K. FLOYD and I. C. H. SMITH 617

Pulmonary vasodilator and vasoconstrictor actions of carbon dioxide. By GWENDA R. BARER and J. W. SHAW 633

Some properties of an SH group essential for choline transport in human erythrocytes. By K. MARTIN 647

PAGE

Effect of ouabain and metabolic inhibitors on the Na and K movements and nucleotide contents of L cells. By J. F. LAMB and M. G. A. MACKINNON 665

The membrane potential and permeabilities of the L cells membrane to Na, K and chloride. By J. F. LAMB and M. G. A. MACKINNON 683

Does curare affect transmitter release? By A. AUERBACH and W. BETZ 691

Contractile and electrical responses of vagus-innervated frog sartorius muscles. By LYNN LANDMESSER 707

The functional organization of the parasympathetic secretory innervation of the submandibular gland. By J. EKSTRÖM and N. EMMELIN 727

The glycogenolytic response to stimulation of the splanchnic nerves in adrenalectomized calves, sheep, dogs, cats and pigs. By A. V. EDWARDS 741

PROCEEDINGS OF THE PHYSIOLOGICAL SOCIETY

18–19 *December* 1970

SUBJECT INDEX

Acetylcholine, release from cerebral cortex of (rat), 64*P*
stimulation of eccrine sweating by, 277
ACTH, effect on calcium distribution in adrenal of (cat), 581
Adrenal gland, effect of ACTH on calcium distribution in (cat), 581
Adrenalectomy, glycogenolytic response to splanchnic stimulation after (assorted mammals), 741.
Adrenaline blockade, superior cervical ganglion and site of (rabbit), 107
Aerosol, interpretation of recovery curves, 22*P*
Amino acid, brain entry of (rat), 45*P*
electrogenic transfer mechanism in small intestine of, 46*P*
Amino acids, absorption of, 43*P*
Anal sphincter, the functional internal (monkey), 27*P*
Angiotensin, area postrema and cardiovascular response to, 65*P*
Anions, erythritol permeability of R.B.C. and, 435
Antidiuretic hormone, effect on Na movement in skin of (frog), 119
Atrial receptors, sympathetic efferent activity and stimulation of, 38*P*

Baroreceptor, renal hypertension and activity of (rabbit), 42*P*
Brown adipose tissue, serum insulin and activity of (rabbit), 175

Calcium, effect of ACTH on adrenal gland distribution of (cat), 581
Capacity, frequency dependence of Purkyně fibre(cow) 85
Carbon dioxide, pulmonary vasomotor actions of (cat), 633
Cardiovascular responses, salt loading and (goose), 389
Carotid body, a method for altering the gas tensions within the (cat), 1*P*
Cerebellum, activity in Purkinje cells influenced by climbing fibres in (cat), 135
Choline transport, SH group and erythrocyte, 647
Climbing fibres, spontaneous activity in Purkinje cells influenced by (cat), 135
Computer, instantaneous frequency respiratory, 19*P*
Computer programmes, isometric and isotonic contractions studies with two Lab 8, 12*P*
Cone-rod interaction, visual cortical cells and (cat), 475
Cortical neurones, geometric illusions and visual (cat), 599
Cross-innervation, transformation of myosin by (rat) 455
Curare, transmitter release and (frog, rat), 691
Cutaneous receptors, electrical stimulation of axons from (rabbit), 495

Dissociation curve, oxygen (trout), 71*P*

Eccrine sweat, stimulation by ACh of, 277
End-plate potential, effect of prostigmine on the time course of the (rat), 533
Erythritol, hexoses, anions, and permeability of R.B.C. to, 435
Exercise, adrenocortical activity and, 35*P*
and platelet aggregation, 525
arm circulation during, 41*P*
equipment for monitoring responses during, 17*P*
liberation of phosphate during vigorous, 411

Flexion reflex, afferent depolarization and (cats), 185
Frog skin, effect of ADH on Na movement in, 119
short-circuit, apparatus for, 13*P*
site of permeability barriers in, 50*P*

Haemorrhage, release of corticotrophin and vasopressin by (sheep), 31*P*
Heat stimulation, afferent depolarization and flexion reflex produced by (cats), 185
Hexoses, erythritol permeability of R.B.C. and, 435
Horizontal cells, electrical connexion between retinal (dogfish), 95
Hydration, renal and urine composition response to vasopressin affected by (rat), 311

Insulin, brown adipose tissue activity and (rabbit), 175
Iron, distribution during absorption of (rat), 73*P*

L cell, electrolyte permeabilities and potential of, 683
ouabain and cation movements in, 665
Limb segments, determination by radiology and dissection, 39*P*
Liver, perfusion of isolated (rat), 14*P*
Lungs, gas transit times in, 15*P*
Lysine-vasopressin, renal and urine composition doses of (rat), 291, 311

Magnesium, efflux from single muscle fibres of, 55*P*
Malnutrition, carbohydrate metabolism and infantile, 30*P*
Mammary ducts, permeability during lactation of (goat), 48*P*
Mammary gland, membrane potentials in (rat), 49*P*
Membrane binding, tetrodotoxin and, 235
Membrane currents, voltage-clamp studies in isolated neurone of (gastropod), 1 and 21
Membrane potential, electrolyte permeabilities of L cell and, 683
Mesenteric vein, reflex evoked by congestion of, 37*P*
Methacholine, stimulation of eccrine sweating by, 277
Micro-electrode, class unit for, 9*P*
Muscle, force–velocity relations of cross innervated fast and slow (cat), 66*P*
Muscle spindle, active shortening and response of (toad), 28*P*
Myosin, effect of cross-innervation on (rat), 455

Negative response, retina and proximal (pigeon), 35*P*
Nerveside, the action on Auerbach's plexus of (rabbit), 571
Neurone, prediction of repetitive activity in (gastropod), 31
Nitrogen, calibration of measurements of blood, 20*P*
Nucleotide, ouabain and inhibitors and L cell content of, 665

Optic cortex, cone-rod interaction in cells of visual cortex (cat), 475
Optic fibres, innervation of tectum by, 34*P*
Optical illusions, response of cortical neurones and (cat), 599
Ouabain, cation movements in L cells and, 665
effect on Na pump in Girardi cells of, 57*P*

Phosphate, vigorous exercise and liberation from muscles of, 411
Platelets, exercise and aggregation of, 525
Polyspermy, nicotine curare and, 62*P*
Precedence effect, lesion of auditory cortex and, 24*P*
Prostaglandin, myometrial enhancement and, 53*P*
Prostaglandin E_1, effect on ureter of (dog), 51*P*
Prostigmine, effect on time course of the e.p.p. of (rat), 533
Pulmonary stretch receptors, comparison in man, cat and dog, 329
Purkinje cells, activity in cerebellar (cat), 135
Purkinje fibres, frequency dependence capacity of (cow), 85

R.B.C., SH group and choline transport in, 647
Red cells, erythritol permeability of, 435
Renal medulla, diuresis and Na content of (rat), 72*P*
Repetitive activity, prediction from voltage-clamp studies of (gastropod neurone), 31
Retina, electrical connexion between horizontal cells in (dogfish), 95
Running, mechanical efficiency, wind resistance and, 255

Salt-gland, blood flow and secretion of (goose), 373
intracellular electrolytes and secretion by (goose), 399
Salt-loading, cardiovascular responses to (goose), 389
Seminiferous tubules, fluid and electrolyte transport in (rat), 557
Sensory fibres, activity in vibrissae (cat), 215
Shock, vasoactive hormones in endotoxin (cat and dog), 69
Sinus arrhythmia, 59*P*
incidence of, 58*P*
Slow muscle fibres, mechanical and thermal properties of (frog), 617
Smooth muscle lever, 3*P*
Sodium phosphate, absence of action on blood vessels of, 411
Splanchnic nerve, adrenalectomized glycogenolytic response to stimulation of (assorted mammals), 741
Stilboestrol, response to isoprenaline and (rabbit), 70*P*
Stimulator, double pulse, 5*P*
high-voltage class, 4*P*
Stretch reflexes, comparison at neurone of vibration and, 25*P*

Submandibular gland, secretory innervation of (cat), 727
Sulphydril group, choline transport in R.B.C. and, 647
Superior cervical ganglion, site of adrenaline blockade in (rabbit), 107
Sweat, stimulation by ACh and methacholine to, 277
Sweat glands, cyclic AMP bradykinin and, 68*P*
Sympathetic stimulation, vasodilatation after preganglionic (cat and dog), 55

Tachypnoea, lung vagal afferents and (rabbit), 345
Tentacles, tactile sense in slugs, 8*P*
Tetrodotoxin, nerve membrane binding of, 235
Thermoregulation, assessment of central drive for, 32*P*
injection of TAB vaccine and monoamines and (sheep), 60*P*
Thoracic duct, pressure waves in (dog), 507
Transducer, displacement, 11*P*
Transmitter release, curare and (frog, rat), 691
nerve size and (frog), 545
Tyrosine transaminase, cholinergic regulation of hepatic activity of (rat), 421

Ureter, effect of sympathetic stimulation and sympathomimetic drugs on (rat), 67*P*

Vagal afferents, tachypnoea and lung (rabbit), 345
Vagus, responses of sartorius innervated by the (frog), 707
Vasoactive hormones, endotoxin shock and (cat and dog), 69
Vasodilatation, sympathetic stimulation and (cat and dog), 55
Vasopressin, renal and urine composition and doses of lysine (rat), 291 311
Vibrissae, activity in sensory fibres from (cat), 215
Visual after-effects, orientation specificity, 157
Voltage clamp, isolated neurone studied by (gastropod), 1 and 21

Water content, NaCl and polyethylene glycol in control of kidney slices (rat), 227
Wind resistance, the mechanical efficiency of walking and running influenced by, 255
